There's no doubt you've looked into various business opportunities in the past. I suspect you've even made an honest attempt to start one or more of these plans only to find frustration and your wallet at bit smaller in the process.

Well, my friend, I've been there too—in fact more times than I care to admit.

And I'd like to share my discoveries with you.

Now before you go running off, silently cursing me under your breath, please hear me out! It'll be worth your time, I promise.

For starters by the time you read this letter you'll be one of select

few who'll know exactly how easily earn hundreds, thousands possibly millions from what I call *the perfect business!*

Just think about what it means to have a slick running operation that runs automatically 24-7 producing a steady income even when you're out loafing or goofing off.

This good cash flow can be generated from the privacy of your home without the headaches normally associated with traditional business.

If you decide to try this business (I'll tell you about it shortly) you'll see why I call it the "perfect business!"

And second you'll be far richer in record time. The reason I can confidently say this is because you'll have access to all of the wealth and business building secrets, tips, and shortcuts that have taken me and many of my colleagues years to discover.

In a short time these same secrets will be in your possession and you too will be able to crank out automatic cash flows simply and easily!

The Perfect Business

I mentioned "the perfect business" earlier. That's what me and my small group of insiders have called this business—and for good reason. There are not many businesses you can start these days that offer. . .

Unlimited income potential. A few of my more "serious" colleagues are raking in thousands of dollars monthly. And one very serious player earned \$650,000 during his best month. Scores are earning six figures yearly!

Easy to get started. No previous experience or educational background is needed to earn big money in this exciting business.

Little overhead. You can start right from your kitchen table if you like. No need to lease expensive office space or special equipment.

Huge market potential. The industry is one of the hottest right now. Internet sales alone netted over \$2.4 Billion in annual dollars!

Start part-time. Numerous successful direct marketing entrepreneurs begin on the job training by starting small working a few hours each week. Now you can too!

Fun and excitement is business as usual for direct marketers. One of the few businesses where you can pick a product or service that you love and still earn a handsome income from home.

And that's just for starters. Now I know you're wondering what this is all about.

I don't mean to tease you so. Besides called the perfect business, this business is also known as direct marketing, direct response, and more commonly called mail order.

Ok, ok I know what you're thinking—maybe you've tried mail order before but things didn't quite work out the way you wanted.

Again, I've been there too. But I promise you've never seen like this and I can prove it!

During my 20 years as a mail order

operator I've hit a bump or two and know what pitfall to avoid.

But it wasn't till my best buddy finally convinced me to put my money making secrets down on paper.

He'd gotten himself in a "tight spot" and needed a way to earn a few thousand bucks quickly.

I quickly suggested he tap into the mail order business—it was quick and easy to start, required very little money to get it started and the income potential was excellent.

So with that I agreed to coach him and made notes along the way. These notes became my buddy's business blueprint and eventually let to this course I affectionately call . . .

The Mail Order Cash Machine

With my help, my buddy experienced great successes and he didn't have a lick of business or marketing experience at all.

In fact any time he needs some extra cash, he simply crank up his mail order machine and banks his profits.

At the risk of sounding boastful, my newest course is the closest thing to a virtual cash machine as you could get.

It's free of hype, technical jargon, and unnecessary filler and written for anyone who wants some extra cash fast!

You'll get this complete cash producing system presented in simple, non technical language. In fact you can usually ready the entire course in about two hours.

Here's a brief overview of what this course includes:
